The Francisco has all of the perks of a modern home, with the space and comfort of Southern style. Exterior upgrades include Board and Batten siding, shed roofing, and a stained gable to accent the outward aesthetic. A second living room is nestled between the second floor bedrooms, which can be used as a playroom. Stainless steel appliances are standard in the kitchen, along with an island housing plenty of cabinet space and eight granite options for countertops. Buyers can choose to incorporate detailing on the kitchen island and master bedroom ceiling. Decorative light fixtures are available throughout the home. A freestanding tub beneath pendant lighting pairs seamlessly with a fully tiled shower and frameless mirror in the master bath.
