Very unique home with massive amounts of outdoor space. This is a 4 bedroom, 2 bath home with horse/small animal barn at the back end, complete with stalls and cages. Entire upper floor (which runs the full length of the home and barn) is currently used for storage and entertainment space. It has HVAC trunk lines in place to be finished square footage. The living quarters are on the main level, and look out on the fields and Koi ponds behind the home. Backyard is large, very private, and fenced. A covered pavilion and entertaining area joins the house out back as well. There is a very nice steel detached garage/workshop at the driveway with a lift, and another out-building beside the house. There are two barns that are placed along the driveway, for access to the hayfields beyond (also available for sale - mls #1289700). More acreage may likely be available as well. You must see this property and all it has to offer! Too much to list here! Call to schedule your personal tour today! Buyers to verify anything of concern. Double oven to be replaced with a single oven prior to closing.
